

INVEST IN WOMEN'S HEALTH

GLOBALLY, **GIRLS AND WOMEN** HAVE LESS ACCESS TO **HEALTH CARE**.

TODAY, WOMEN ARE MORE LIKELY THAN MEN TO:

Acquire HIV

Die from heart disease

Suffer from malnutrition

Face severe complications from diabetes

266,000 women die of **cervical cancer** each year, the vast majority in developing countries.

WHY DO WOMEN LACK ACCESS TO CARE?

High user fees

Severe health worker shortages

Spousal abuse & control

HIV/AIDS-related stigma

LIFESAVING SOLUTIONS

When women have access to comprehensive health services, preventive care, and treatment, it saves **lives**, **time**, and **money**.

WOMEN DELIVER

WHO WINS? **EVERYBODY.**
